

Introduction

eco Comfyride™ is a specially produced woodchip fibre which is ideal for indoor and outdoor surfaces. Used in indoor and outdoor arenas and menages, it is produced from selected timber which is shredded and specially graded to remove all fine material. Delivered in bulk **eco Comfyride™** is a cost effective alternative to other highly expensive man-made surfaces.

eco Comfyride™ is:

- Virtually dust and odour free
- Soft under foot
- Environmentally friendly
- Easy to refurbish
- Long lasting
- Durable and easy to maintain
- Easy to install
- In keeping with outdoor environment
