

## 20MM COTSWOLD CHIPPINGS

**Light and bright in colour, the natural rockery pieces will make a bold statement in any garden landscape and can be used to brighten up rockeries and water features too.**

The chippings can be used for decorative purposes and can modernise your landscaping scheme. As the pieces are obtained from natural stone, they hold their form and boast a healthy life span, ensuring they look superb, for years to come.

Chippings can be paired with alternative aggregates for a modern scheme and create a hard wearing area that will be set to last. As the chippings are compacted, they are an ideal solution for driveways or paths too.

The Cotswold pieces will enhance your current scheme and will brighten up tired beds, borders or planters.

<b>Main Uses:</b>	Driveways, Decorative Landscaping, Rockeries & Water Features
<b>Size:</b>	20mm
<b>Colour:</b>	Cream - This aggregate is a natural Cotswold stone which is cream in colour. It's worth noting that each piece of Cotswold rockery is unique in size and shape so there will be some variations.
<b>Shape:</b>	Angular - The Cotswold rockery pieces are a naturally quarried product which may result in slight variations in formation, size, colour or shape.
<b>Rock Type:</b>	Cotswold Stone

### User Benefits

- Typically, larger Cotswold stone pieces are used in Gabion baskets. They can make a great feature or structure wall if you are looking for an industrial design effect.
- Our new smaller 20mm pieces are a great accompaniment for such a project and can compliment borders, rockeries or seating areas.
