

ECO MIX

Eco Mix is known to improve water retention and drainage capability, recommended by those looking to improve soil.

A peat-free soil improver, the Eco Mix is renowned for breaking up heavy soils, adding organic matter and slowly releasing nutrients in a suitable and environmentally friendly manner.

The BSI PAS100 (Publicly Available Specification 100) for composted materials was sponsored by WRAP (Waste and Resources Action Programme) and developed in conjunction with the AFOR (Association for Organics Recycling).

Our Eco Mix complies with this standard and a test certificate is available upon request.

The Eco Mix is used within our soil process on site – there is more information available on soil production in our Recycling section.

Input materials:	Biodegradable waste (plant matter & plant tissue waste)
Particle Size Distribution:	>100% passing a 7.0mm screen >90% passing a 4.0mm screen >50% passing a 1.0mm screen
Bulk Density:	500 – 600 g/litre
Moisture Content:	35% m/m
Dry Matter:	65% m/m
Organic Matter:	(as loss recognition) 25% of the dry matter
pH:	7.5 – 8.5
Electrical Conductivity:	400µS/cm
Purity:	Substantially free of physical contaminants, viable weed seeds and pathogens
Potentially Toxic Elements:	Within acceptable limits (“Heavy Metals”)
Certification:	PAS100 & the Compost Quality Protocol, in which this quality compost was produced in compliance with the Compliance Quality Protocol

User Benefits

- Peat-free soil improver ideal for breaking up heavy soils and adding organic matter to sandy soils
- Improves moisture retention and soil structure
- Nutrient-rich and an excellent source of organic matter helping plants establish quickly
- Easy to use and maintain
- This material is also available in a coarse grade which is screened to 20mm

Restrictions

Our Eco Mix™ Compost is not designed for use as a growing medium, a medium for planting acid-loving species or as a top dressing for turf.

Safe storage, handling, application & use of quality compost.

Information on good practice for use as compost as set out in Appendix F of the Compost Quality Protocol has been highlighted.
