

MULTI PURPOSE

Multi Purpose compost is nutrient-rich, an excellent source of organic matter and helps plants to establish themselves quickly.

The product is easy to use and requires little maintenance.

Used regularly in potting and seed trays, the material is a great option for fledgling plants and seedlings.

Eco's multi-purpose compost is ideal for use as a general growing medium particularly for grass, vegetables and herbs.

Input materials:	Biodegradable waste (plant matter & plant tissue waste)
Particle Size Distribution:	100% passing a 7.0mm screen >90% passing a 4.0mm screen >50% passing a 1.0mm screen
Bulk Density:	456g/litre
Moisture Content:	35% m/m
Dry Matter:	65% m/m
Organic Matter:	(as loss on ignition) 25% of the dry matter
Carbon Nitrogen Ratio:	Carbon: Nitrogen Ratio: 12:1
pH:	pH: 6.5
Electrical Conductivity:	345 µS/cm
Purity:	Substantially free of physical contaminants, viable weed seeds and pathogens
Potentially Toxic Elements:	Within acceptable limits
Certification:	PAS100 & the Compost Quality Protocol, in which this quality compost was produced in compliance with the Compliance Quality Protocol

User Benefits

- Improves moisture retention and soil structure
- Nutrient-rich and an excellent source of organic matter, which helps plants to establish quickly
- Easy to apply
- Requires little maintenance

Restrictions

Our Multi-Purpose compost is not designed for use as a medium for planting acid loving species (eg Rhododendron) or as a top dressing for turf.

Safe storage, handling, application & use of quality compost.

Information on good practice for use as compost as set out in Appendix F of the Compost Quality Protocol has been highlighted.
