

Data Sheet

Eco Mix Pro

Peat free and sustainably produced, Eco Mix Pro is perfect for kick starting pitches and fairways by adding organic matter and slow release nutrients in an environmentally conscious way.

Are you after the a glowing lawn, the fairest fairways or greenest pitches? With Eco Mix Pro you can give your turf the care and attention it deserves.

Locally produced and 100% organic, Eco Mix Pro nourishes the sward and improves water irrigation efficiency, reducing the need for wetting agents.

Double screened to 10mm, with 95% passing 4mm, this peat-free, nutrient rich soil improver is quickly absorbed, avoiding unsightly residue on managed turf.

Add Eco Mix Pro to the root zone of grass for the most vibrant, luscious and healthy turf.

Input materials:	Biodegradable waste (plant matter & plant tissue waste)
Particle Size Distribution:	>100% passing a 8.0mm screen >95% passing a 4.0mm screen >65% passing a 1.0mm screen
Bulk Density:	500 – 600 g/litre
Moisture Content:	35% m/m
Dry Matter:	65% m/m
Organic Matter:	(as loss recognition) 40% of the dry matter
pH:	7.5 – 8.5
Electrical Conductivity:	521µS/cm
Purity:	Substantially free of physical contaminants, viable weed seeds and pathogens
Potentially Toxic Elements:	Within acceptable limits (“Heavy Metals”)
Certification:	PAS100 & the Compost Quality Protocol, in which this quality compost was produced in compliance with the Compliance Quality Protocol

User Benefits

- Improves moisture retention and soil structure
- Nutrient-rich and an excellent source of organic matter, which helps turf to establish quickly
- Easy to apply
- Requires little maintenance
- Perfect for the repair and maintenance of turf on tees, fairways and grass pitches

Restrictions

- Not suitable as a potting compost – for this you need a lightweight soil or multi-purpose compost.
- Safe storage, handling, application & use of quality compost.
