

## Data Sheet

# Eco Peat Free MultiPurpose

**Our peat free multipurpose compost, is the perfect growing media for cuttings, rooting, planters and hanging baskets.**

PAS100 certified compost, recycled and sustainably produced, and blended with wood fines and sawdust.

Reliable, organic and a general all-rounder, our Peat Free MultiPurpose compost gets the job done across the board. Perfect for all stages of plant growth, ensuring stronger plant development with more flowers and better vibrancy. A superb blend to give you the best results in hanging baskets and potted planters.

Use Peat Free MultiPurpose for general plant growing, seed trays and potting on for optimum results. This is also an ideal compost for seeding grass and growing vegetables and herbs.

<b>Input materials:</b>	Biodegradable waste (plant matter & plant tissue waste), virgin wood sawdust, wood chip fines, anaerobic digestate
<b>Bulk Density:</b>	450-550g/litre
<b>pH:</b>	7 -8
<b>Purity:</b>	Substantially free of physical contaminants, viable weed seeds and pathogens
<b>Certification:</b>	PAS100 & the Compost Quality Protocol, in which this quality compost was produced in compliance with the Compliance Quality Protocol

### User Benefits

- Improves moisture retention and drainage
- Nutrient-rich and an excellent source of organic matter, which helps plants to establish quickly
- Easy to apply
- Requires little maintenance

### Restrictions

Our Peat Free MultiPurpose compost is not designed for use as a medium for planting acid loving species (e.g Rhododendron) or as a top dressing for turf.

### Recommended Depths

**Hanging baskets, planters, growing fruit & vegetables:**

Fill the container, leave 20 - 30mm from the rim
